ABOUT US

SUNSHINE NHN CO., LTD is a professional trading company with many years of experience in the wood industry. We specialize in connecting global customers with reliable and high-capacity manufacturers of industrial wood products, including plywood, LVL, veneer, film-faced plywood, and packing plywood.

With our strong network of large-scale factories and skilled production partners, we are able to provide high-quality products that meet international standards such as FSC®, CARB P2, E0, and E1. Our partner factories are equipped with advanced machinery and modern production techniques, allowing us to fulfill both standard and customized requirements based on each customer’s specific needs.

Located close to key raw material supply areas, our supply chain benefits from reduced transportation costs for materials, which helps us offer highly competitive pricing without compromising product quality. This strategic advantage, together with our industry expertise, enables us to provide cost-effective and reliable sourcing solutions for customers in both domestic and international markets.

At SUNSHINE, we focus on sustainability, legal timber sourcing, strict quality control, and long-term cooperation. We are committed to being a trusted sourcing partner who helps customers access the right factories, the right products, and the best value from Vietnam’s wood industry.

COMPANY INFORMATION

Company name	SUNSHINE NHN CO.,LTD
Director	Nathan Nguyen

Address	21 Thuong Cat, Thuong Cat ward, Hà Noi city, Viet Nam
Website	www.sunshinenhn.com

VISION

To become a trusted global trading partner in the industrial wood panel sector, bridging customers with qualified manufacturers, ensuring consistent quality, competitive pricing, and sustainable sourcing solutions that enhance the value of Vietnamese wood products worldwide.

MISSION

SUNSHINE NHN CO., LTD is committed to serving as a trusted trading partner in the wood panel industry, delivering high-quality and internationally compliant products through a strong network of reliable manufacturers. We focus on efficient sourcing, competitive pricing, sustainable practices, and long-term cooperation with customers worldwide.

CORE VALUES

Quality, reliability, and flexibility are the foundation of our business. As a trading company, we connect customers with trusted manufacturers, legally sourced materials, and cost-effective solutions that meet international standards and specific requirements. We are committed to sustainable practices and long-term value for global partners.

SUNSHINE NHN CO., LTD specializes in sourcing and supplying high-quality industrial wood products through a strong network of trusted manufacturers, including:

- Veneer Plywood – veneer-coated plywood for furniture and construction applications.
- LVL (Laminated Veneer Lumber) – high-performance engineered wood for structural and furniture use.
- Film-faced Plywood – durable film-coated plywood designed for concrete formwork and shuttering.
- Veneer – thin wood sheets used as essential raw materials for plywood, LVL, and laminated wood products.
- Packing Plywood – plywood suitable for packaging, crates, pallets, and industrial packing solutions.

With many years of experience in the wood industry, SUNSHINE NHN CO., LTD helps customers access reliable factories capable of producing high-quality products that meet international standards such as FSC®, CARB P2, E0, and E1. We provide flexible sourcing solutions for both standard and customized requirements, serving domestic and export markets with competitive pricing and dependable quality.

VENEER PLYWOOD

Product overview

Veneer Plywood, also known as Commercial Plywood, is made from multiple layers of natural wood veneer that are tightly pressed together using high-quality adhesive. The veneer surface layer preserves the natural, wood-like appearance while offering a far more cost-effective alternative to solid wood.

At SUNSHINE NHN, we offer a wide range of veneer surface options to meet various needs and different market requirements. Our factory is equipped with modern automated production lines, strict quality-control procedures, and multiple international certifications, ensuring that our products consistently meet the most demanding standards of global markets.

Standard Size	1220mm × 2440mm
Maximum Size	1250mm × 2500mm
Thickness	5mm – 25mm (Customized upon request)
Core Material	Eucalyptus / Manglietia / Bodhi / Acacia / Mixed
Surface	Birch, Oak, Poplar, Okoume, Pine,... (Customized to customer requirements)
Adhesive Used	E0, E0 (15% melamine) CARB P2, E1 (Customized to customer requirements)
Moisture Content	≤ 12%
Tolerance	±0.3 – 0.5mm
Certifications	FSC, CARB P2, JAS
Applications	Walls, floors, ceilings, interior furnishings, packaging...

LAMINATED VENEER LUMBER (LVL)

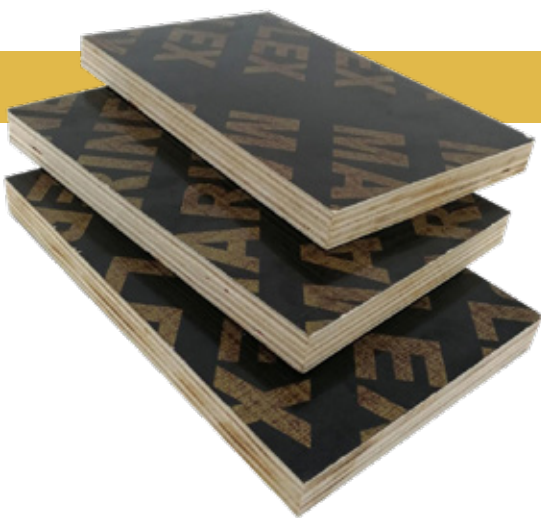

Product overview

LVL is a high-performance engineered wood product that has been widely used around the world for more than 30 years. Thanks to its strength and dimensional stability, LVL has become an essential material in construction, furniture manufacturing, structural beams, and the packaging-pallet industry.

The product is manufactured by peeling thin wood veneers from logs, inspecting each layer for quality, then bonding them together with the grain running in the same direction under controlled pressure, temperature, and specialized adhesive technology.

Standard Size	1220mm × 2440mm
Maximum Size	1250mm × 2500mm
Thickness	5mm - 25mm (Customized upon request)
Core Material	Eucalyptus / Manglietia / Bodhi / Acacia / Mixed
Surface	Poplar, Birch, EV (technology), Pine, Okoume,...
Adhesive Used	E0, E0 (15% melamine) CARB P2, E1 (Customized to customer requirements)
Moisture Content	≤ 12%
Tolerance	±0.3 – 0.5mm
Certifications	FSC, CARB P2, JAS
Applications	Beams, sofa frames, house frames, ...

FILM-FACED PLYWOOD

Product overview

Film-Faced Plywood is a type of plywood coated with film specifically designed for the construction industry, particularly for formwork and shuttering applications. The product is made from multiple layers of wood veneers bonded tightly with high-quality waterproof adhesive, with both surfaces covered by phenolic film to enhance durability, waterproofing, and abrasion resistance.

With its smooth, flat surface and strong load-bearing capacity, Film-Faced Plywood delivers excellent performance in concrete works, helping to create clean, high-quality concrete finishes, reduce adhesion, and enable easy removal during dismantling. Thanks to its ability to be reused multiple times, the product helps optimize costs and minimize material wastage on construction sites.

CORE VENEER

Product overview

Veneer, also known as peeled veneer, is a thin layer of wood sliced directly from logs using specialized peeling machines. It is an essential raw material in the production of plywood, LVL, film-faced panels, and various other engineered wood products.

Veneer features uniform thickness, continuous grain, and high dimensional stability, enhancing the strength and load-bearing capacity of finished products. Depending on the wood species, veneer can offer different colors, grain patterns, and mechanical properties to meet diverse production requirements across industries.

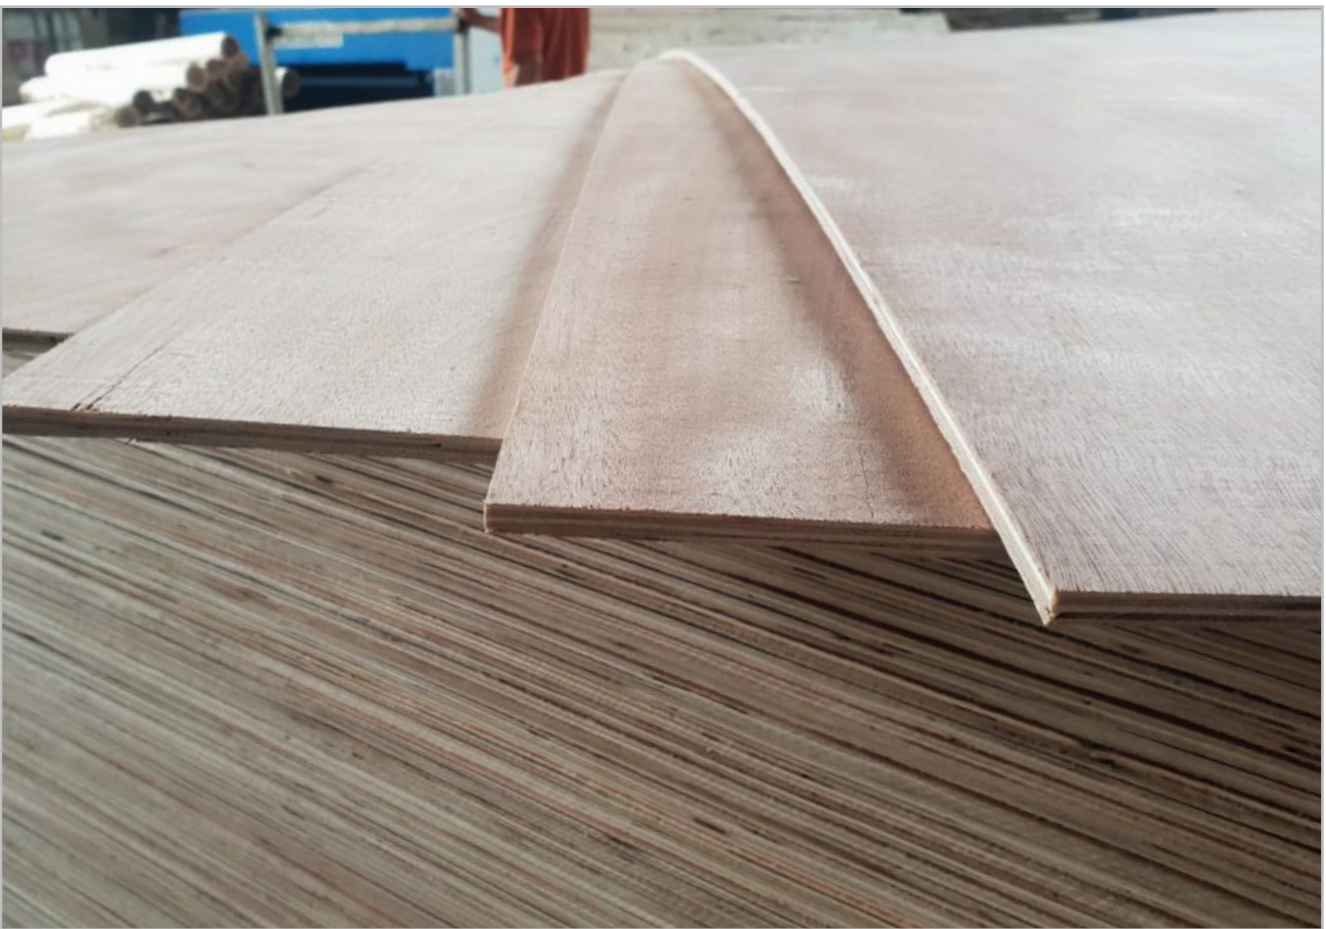

PACKING PLYWOOD

Product overview

Packing Plywood is a type of plywood specifically designed for the packaging, packing, and transportation industry. The product is made from multiple layers of wood veneer bonded with high-adhesion glue, resulting in a lightweight, durable, and cost-efficient panel.

Thanks to its stable structure, good load-bearing capacity, and competitive pricing, Packing Plywood is widely used in the production of shipping boxes, pallets, wooden crates, and various industrial packaging solutions. The product can be customized in size, thickness, and core material to meet specific requirements for both domestic transport and export applications.

EXPORT MARKET

SUNSHINE NHN CO., LTD supplies engineered wood products to international markets through a trusted network of qualified manufacturers. With strong industry experience, flexible sourcing solutions, and an experienced export team, we provide reliable quality, competitive pricing, and efficient support for construction, furniture, packaging, and logistics industries worldwide.

United States – a large market with stringent requirements on emissions and timber legality
Europe (EU) – known for high standards in environmental safety and product quality
Japan – demanding exceptional stability and precision in technical specifications

South Korea – prioritizing high durability and premium-quality materials
Australia & New Zealand – markets with strict certification and sustainability criteria
Middle East – strong demand for construction and packaging materials
Southeast Asia – rapidly growing markets in furniture and packaging industries

EQUIPMENT CAPACITY

To ensure the highest standards of product quality and service, SUNSHINE NHN CO., LTD collaborates with carefully selected manufacturing partners equipped with advanced, high-capacity machinery from leading global brands. Through this strong partner network, we are able to offer stable quality, efficient production capability, and reliable supply solutions tailored to customer needs worldwide.

FINAL QUALITY CONTROL

Before each shipment is loaded into containers, every batch undergoes a strict final inspection by our dedicated QC team. This comprehensive outbound quality control process ensures that all products fully comply with agreed specifications, quality standards, and packaging requirements. Through this final checkpoint, SUNSHINE NHN CO., LTD guarantees that only carefully verified goods are delivered to customers, reinforcing our commitment to reliability, consistency, and absolute confidence in every shipment.

SUPPLY CAPACITY

We assist customers in sourcing high-quality wood products through a trusted network of manufacturers certified with FSC®, CARB P2, and emission standards such as E0 and E1, ensuring compliance with legal timber requirements, health safety, and environmental responsibility.

With many years of experience in the wood industry, SUNSHINE NHN CO., LTD connects customers with carefully selected factories capable of delivering consistent quality, precise specifications, and products tailored to the technical requirements of each target market.

Our professional team is always ready to provide effective sourcing solutions, from material selection and technical specifications to packaging options, helping customers reduce costs, improve efficiency, and meet their specific requirements.

As a result, the products we supply are well qualified for export to demanding markets such as the United States, Europe, Japan, South Korea, and others, enhancing our customers' competitiveness and long-term business value.

FSC® Certification

The Forest Stewardship Council (FSC) certification ensures responsible forest management and sustainable timber sourcing to protect the environment.

CARB P2 Certification

Certification for compliance with Phase 2 of the California Air Resources Board (CARB) for wood products with low formaldehyde emissions.

E0 Emission Standard

The highest environmental standard with a formaldehyde emission level of ≤ 0.5 mg/L, ensuring exceptional indoor air quality and safety.

E1 Emission Standard

A European certification standard with a formaldehyde emission level of ≤ 1.5 mg/L, meeting international environmental requirements.
